DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, Species A in the reply filed on 9-11-06 is acknowledged.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority based on applications filed in Japan on 02/14/03, 03/05/03, 03/17/03 and 01/29/04 respectively. It is noted, however, that applicant has not filed a certified copy of the 2003-36737, 2003-58845, 2003-71971 and 2004-20915 applications as required by 35 U.S.C. 119(b).

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed (elected product claims).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claim 1** is rejected under 35 U.S.C. 102(b) as being anticipated by Hart et al. (US5989170).

Hart et al. teach a disc roll comprising: a plurality of annular disc members **16** each defining a hole and having a peripheral surface; and a rotary shaft **13** fitted into the holes of said annular disc members **16** by insertion, whereby the peripheral surfaces of said disc members **16** serve as a conveying surface of the disc roll, wherein said disc members **16** contain a crystalline cordierite-containing ceramic (col. 10, line 65), an inorganic fiber (col. 12, line 11) and a binder (col. 10, line 67). Note that the cordierite being in “powder” form is considered a process of making the final product, the patentability of product does not depend on its method of production. *In re Thorpe*, 777 F.2d 695, 697, 227 USPQ 964, 966 (Fed. Cir. 1985) (citing *In re Pilkington*, 411 F.2d 1345, 1348, 162 USPQ 145, 147 (CCPA 1969)). If a product in a product-by-process claim is the same as or obvious from a product in the prior art, the claim is unpatentable even though the prior product is made by a different process. *Id.* citing *In re Marosi*, 710 F.2d 799, 803, 218 USPQ 289, 292-93 (Fed. Cir. 1983); *Johnson & Johnson v. W.L. Gore*, 436 F. Supp. 704, 726, 195 USPQ 487, 506 (D. Del. 1977); see also *In re Fessmann*, 489 F.2d 742, 744, 180 USPQ 324, 326 (CCPA 1974). Hart et al. teach the same structure as the roll, whether the cordierite is initially powder or any other form is irrelevant when the final structure is the same.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3726

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. **Claim 2** is rejected under 35 U.S.C. 103(a) as being unpatentable over Hart et al.

Hart et al. teach the claimed amounts of inorganic fiber (col. 12, lines 20-22) and binder (col. 12, lines 23-24).

However, Hart et al. do not specifically teach the claimed amount of cordierite.

The particular amount of cordierite is considered an obvious matter of design choice to a person of ordinary skill in the art, at the time of the invention, depending upon the desired strength requirements of the roller.

Furthermore, it would have been obvious to one of ordinary skill in the art at the time of the invention, to have made the prior art at the claimed ranges, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.
